Core Banking Implementation

We enable digital transformation by adopting agile and modern Core Banking systems of the future. We believe in continuous innovation for Banks, so that they can expand their digital horizon & compete effectively to become a Bank of the future.

End to End transformation

Our transformation framework leverages both innovative thinking and industrialized delivery to support transformation journeys, from inception to Go-Live and beyond

Our Accelerator Approach

Systems Limited draws on capabilities and its accelerators for countries and regions and uses the Country Model Banking approach, which is a combination of local market practices and regulatory requirements

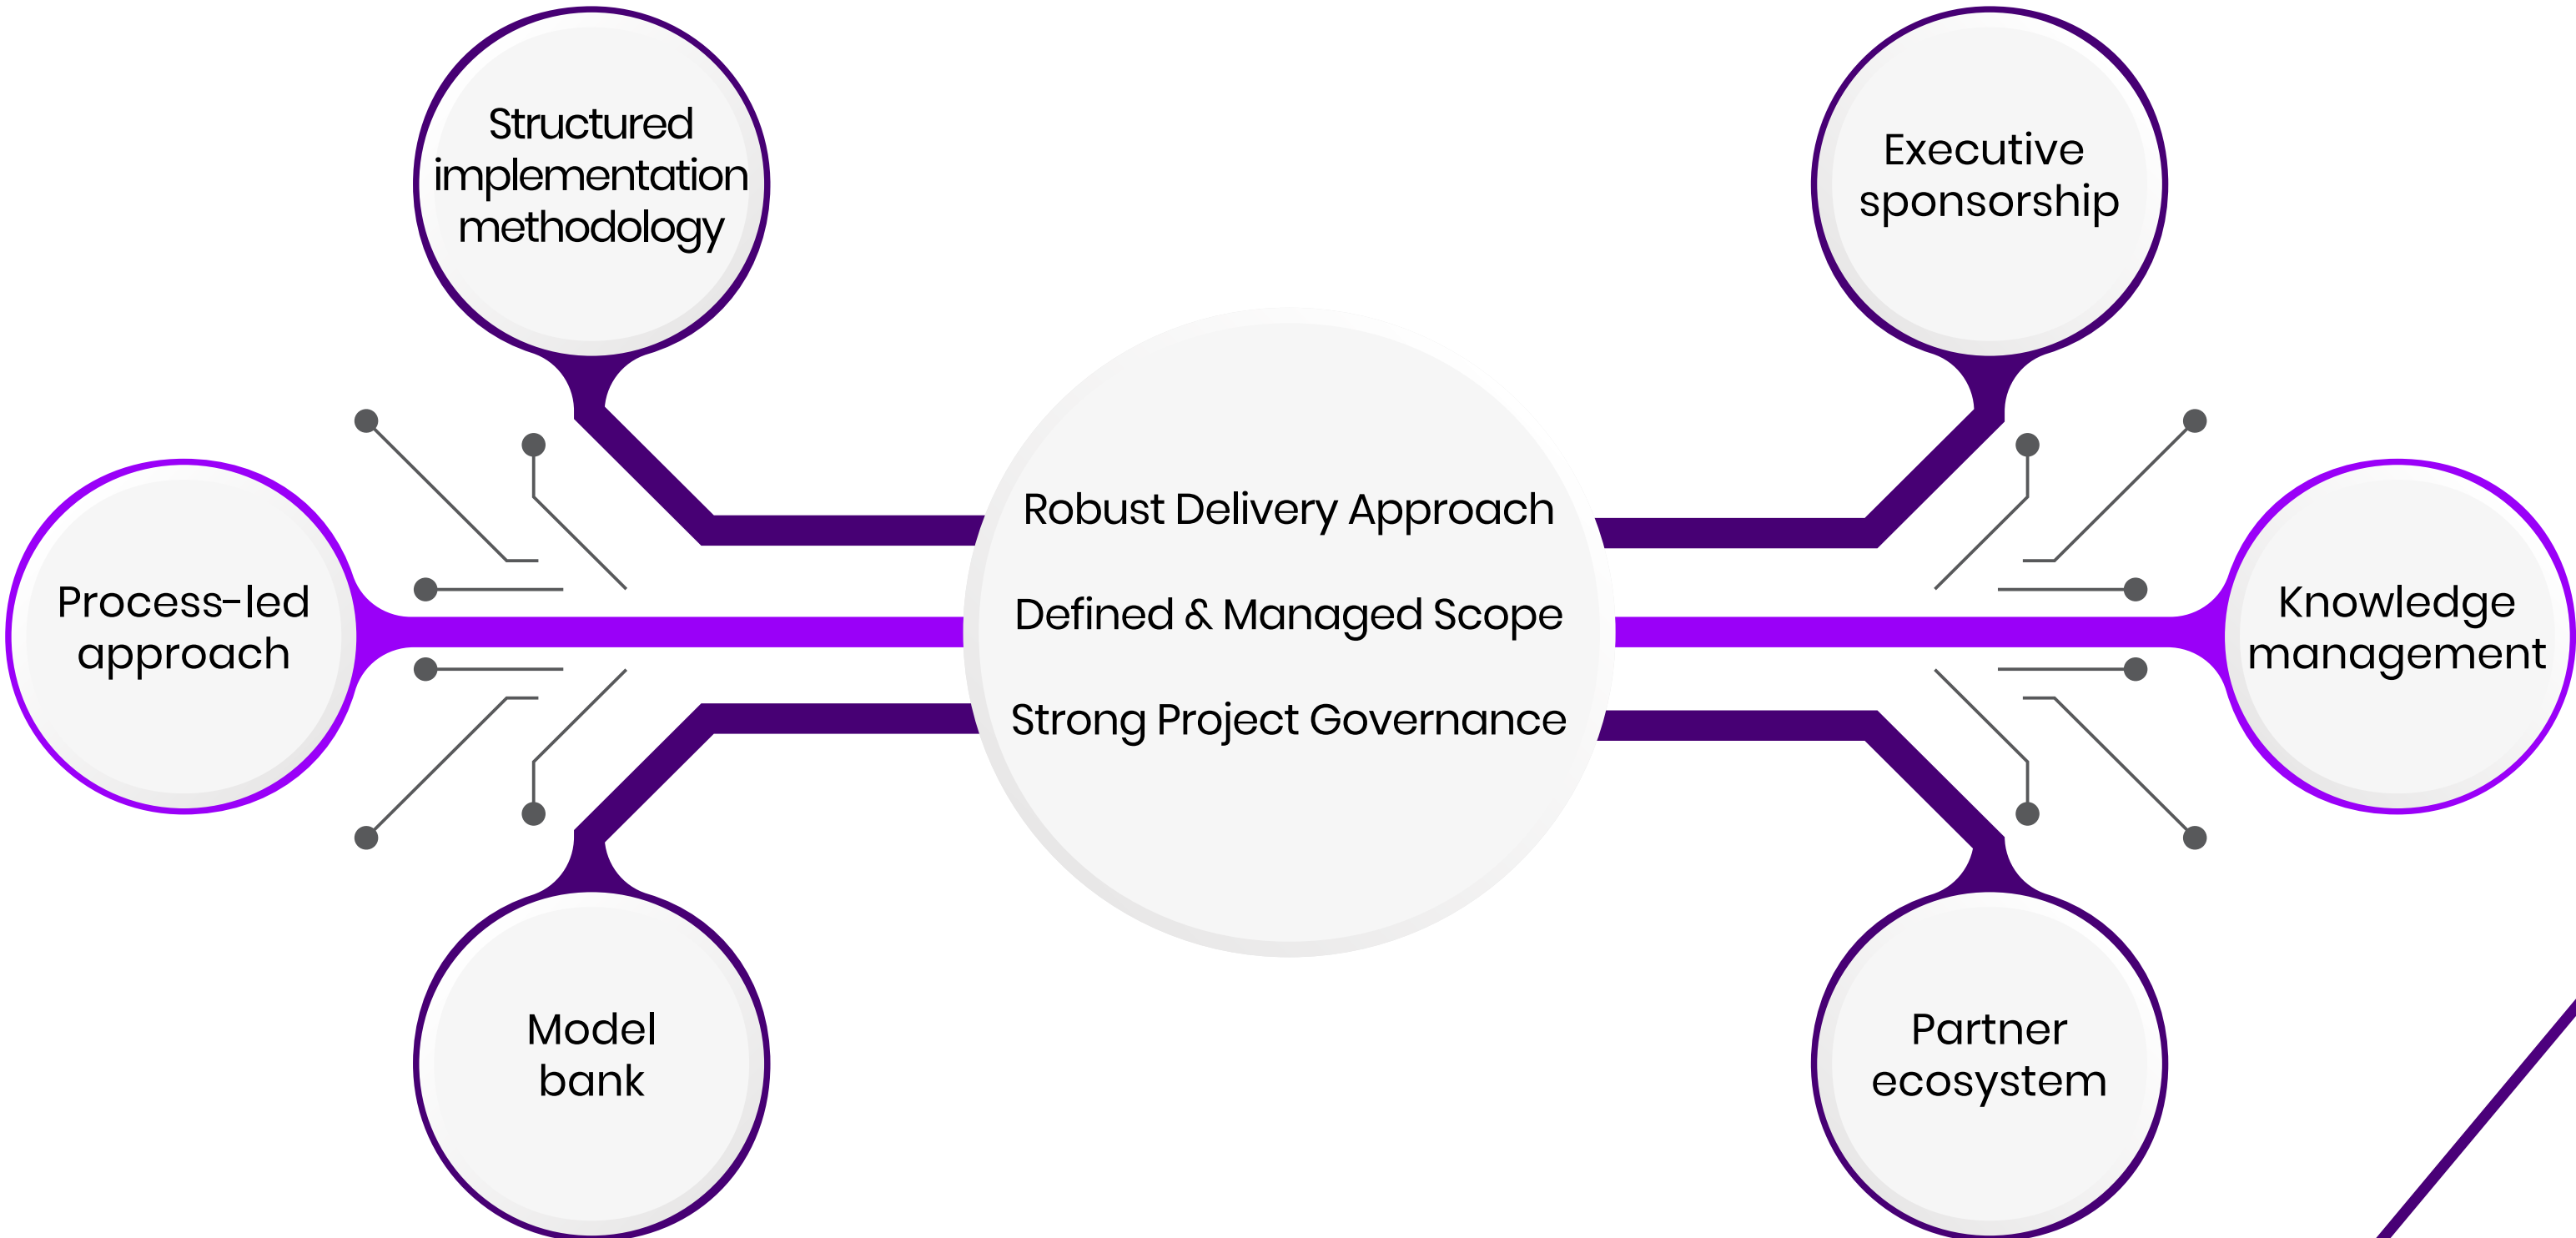

A 360-degree solution

Our approach is to integrate the banking system into the full banking landscape architecture including internal banking applications, 3rd party channels, & global or country specific gateways

Core Banking Implementation

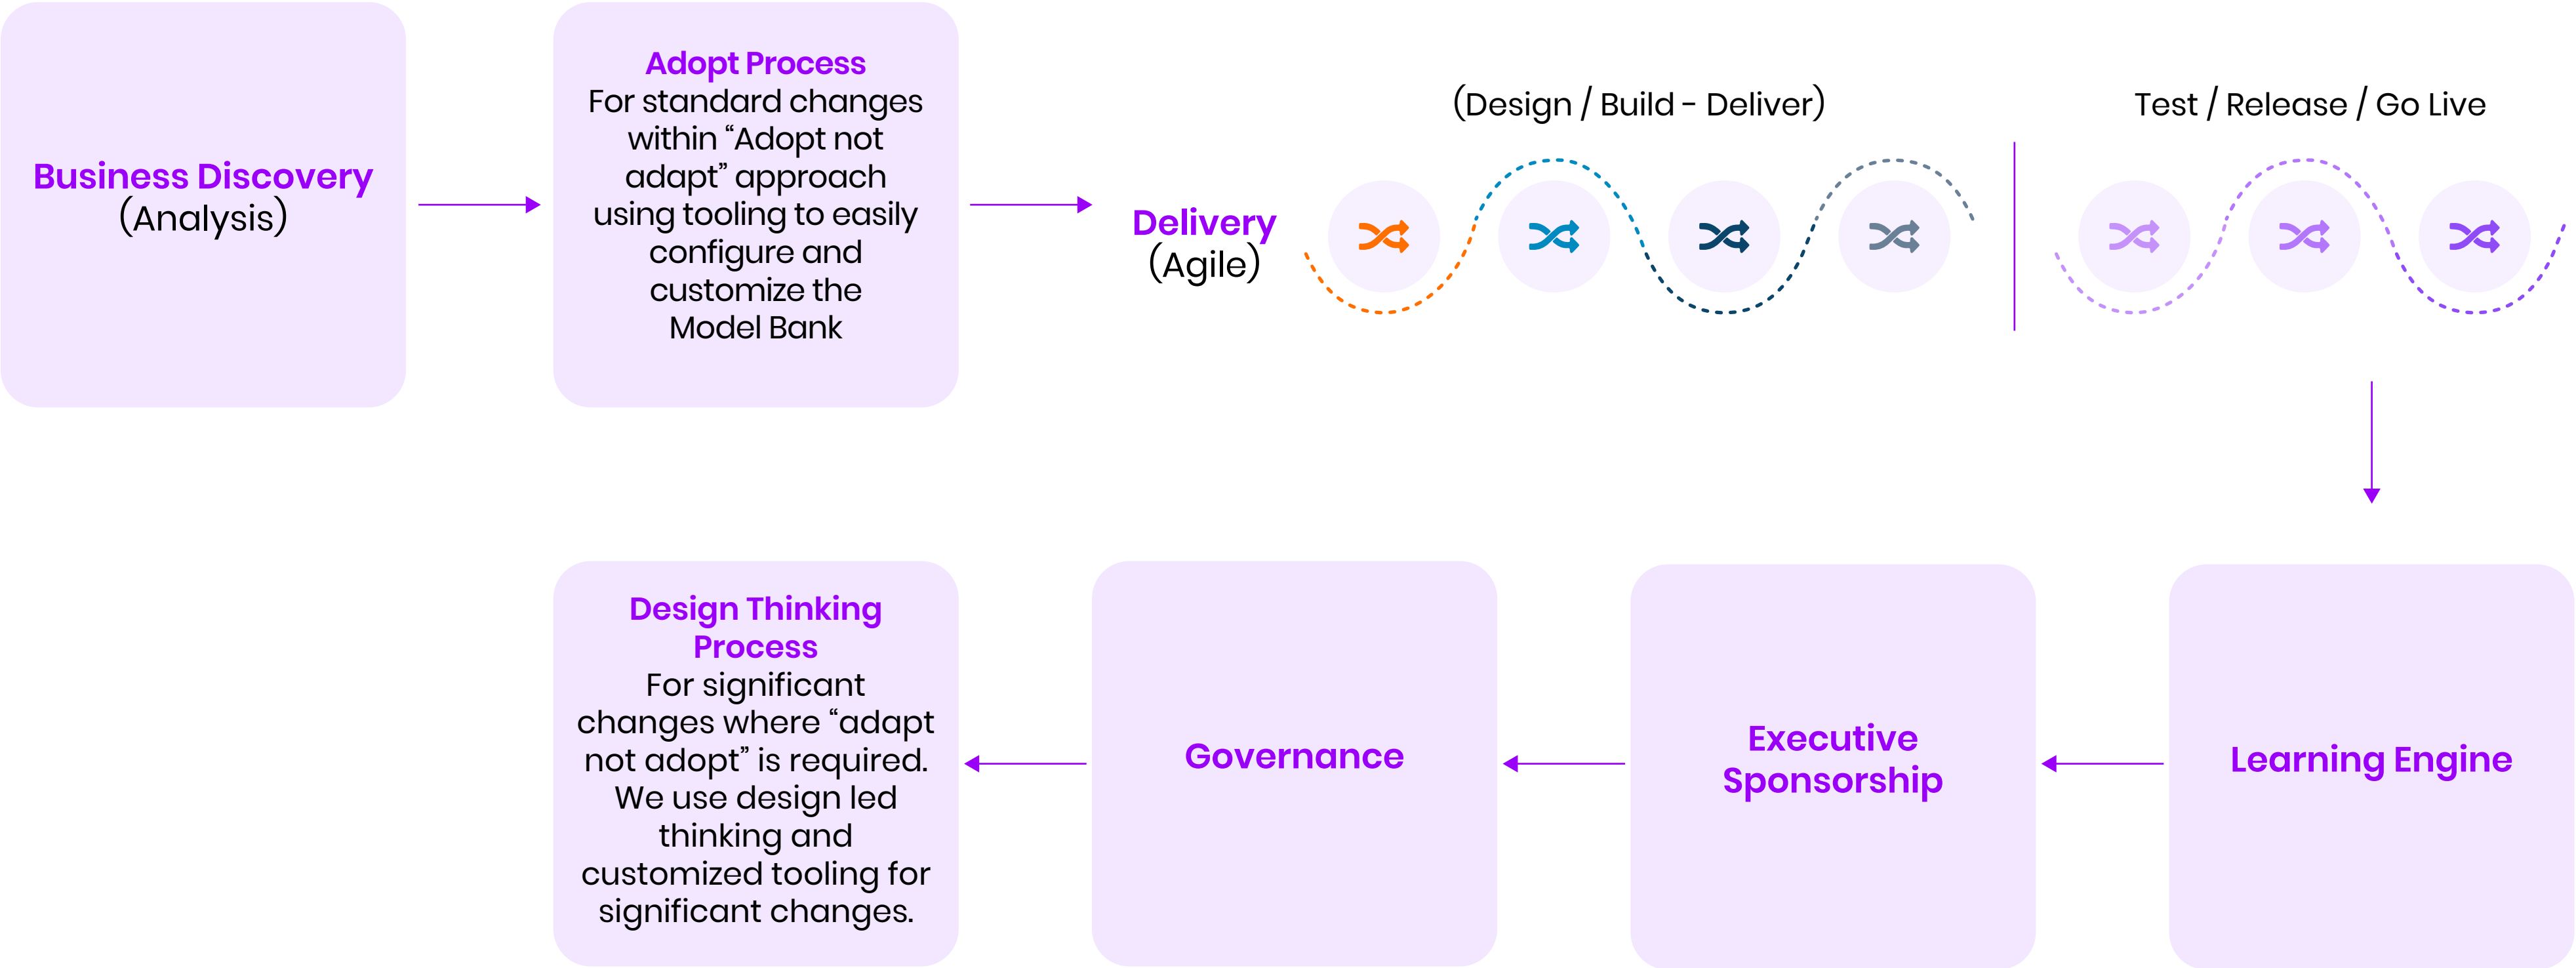

Key Ingredients for Success

Our Track record of successful Core Banking implementations, deep domain knowledge & experience of best practices built in core equips us to handle complex and challenging transformations.

Core Banking Implementation Methodology

A structured implementation methodology that equips us to perform transformations methodically.

Our Core Banking Implementation Accelerators

We stand out with our unparalleled experience gained from a long history of successful Core Banking implementations using unique accelerators & tools.

- Implementation of “bite-sized” modules with rapid deployment and immediate impact.
- Rights to develop Country model banks on top of Temenos Platforms in the GCC region.
- Use of agile methodology with emphasis on incremental releases
- Pre-Built Functionality including Origination & Onboarding Workflows specific to the country.
- Pre-built data migration templates to ease lift & shift.
- Training framework & knowledge sharing for large transformations.

Core Banking on the cloud

Modernize the core with our cloud core banking implementation to stay on the leading edge of technology and compete head-on-head with challenger banks' modern offerings. We promise a core banking model that is built from scratch and that embraces the elastic scalability of the cloud by leveraging a microservices-based architecture. Build an Ultra-Lean, Extremely Agile, Configurable, and Composable core on the cloud with us.

Cloud Assessment & Planning

We analyze your core banking needs by conducting infrastructure & cloud readiness assessments and then aligning results seamlessly with our cloud capabilities, ensuring a strategic and efficient migration plan.

Migration Services

Whether you're looking to rehost, replatform or refactor, we tailor the migration to your core banking needs. Our services also include meticulous Data Cleansing and Migration to ensure a smooth and secure transfer to the cloud environment.

Security & optimization

Our comprehensive approach includes Continuous Monitoring, ensuring real-time threat detection. We employ robust Encryption techniques to protect sensitive data and align with industry Compliance standards.

Testing & Change Management

From User Trainings to comprehensive Training Programs, we empower your team with the skills needed for a seamless transition. Our thorough Performance Testing and Integration Testing protocols guarantee the reliability of your cloud-based core banking system.
